

Before the Sun Singing

E B
Before the sun singing, before the moon
dancing,
C#m A
before the stars took to flight
G#m
Before the streams flowing from
F#m
mountains through the valleys
Emaj7 A
to coastal plains and oceans wide

C#m A
*I've always loved you, and been there for
you,*
G#m F#m
I've always held you in sweet embrace
C#m A
*I've always loved you, I'll never, ever leave
you*
E B
My love transcends time and space

Before laws were given
Before time was opened
Before light beamed and sound roared
Before atoms colliding
Before cells dividing
Before gravity held it all

A
Before there was a 'was'
G#m
I loved you because, because
F#m Emaj7
Love was the very first cause
F#m
Now in every 'is'
G#m
My love for you exists, exists
A E A Emaj7 Amaj7
After all this love persists
E A Emaj7 Amaj7...

A G#m F#m Emaj7 Amaj7 E
